

## Solar Light Battery Replacement

### Standard 26 LED Solar Light Battery Replacement

- Solar light comes with 3 x AA - NiMH ( 1500-2200 ) mAh 1.2v rechargeable batteries.

When necessary, replace with AA NiMH ( **2200-2300 mAh** ) 1.2v rechargeable batteries for longer lamination lifespan. These are very common and can be found at local hardware stores and even Wal-Mart.

### Upgraded 40 LED Solar Light Battery Replacement

- Solar light comes with 1 dual cell 3.7v 5200 mAh lithium battery.

When necessary, replace it with dual cell 3.7v 5200 mAh lithium battery. These are not as commonly found as the AA batteries but still can be found through local hardware stores and Wal-Mart but may need to be ordered. Suggest you take the old battery with you when visiting local merchants to insure you get right battery.

To replace the battery for either light remove the light from top of pole by first removing the finial-ornament. This may require you to loosen the "set screw" on the truck hold the shaft of the finial in place.
