

## Super Duty Telescoping Flagpoles - Made In USA

### Super-Duty Telescoping Flagpoles

This **10 Gauge** Aluminum Telescoping Flagpole is the super duty choice for high wind areas. Comes with 3" metal ball finial, all hardware to fly 2 flags in kit. It features 2.75" base of 10-gauge aluminum all metal components for durability. It comes with aluminum ground sleeve that is set in concrete and then your pole is inserted into the ground sleeve once concrete has cured. Telescoping flagpoles makes for easy economical access when maintenance is required, no lift truck required. Compare this to the most common 18- or 16-gauge poles and it is an outstanding value that will outlast the others.

**15 Year Manufactures Warranty**

### 20 foot 2.75" Diameter Telescoping Super Duty Flagpole

The diagram shows five circular cross-sections of flagpole bases. Three are labeled '11 Gauge' with base diameters of 2", 2.4", and 2.75". Two are labeled 'Other' with base diameters of 2.625" and 2". The 2.75" base has a red star icon.

**Compare this  
10 gauge pole to  
others 16 gauge  
and 18 gauge poles**

**Over time in the high wind  
areas the others will give  
out and bend.**

**When that happens your  
options are repair it yourself  
if the compents are available.  
Or ship it back to the  
manufacture for warranty  
repair or replacement.**
